REF. 100

May 13. 1870 Prof James  
Mayer  
5, College Terrace,  
Yorktown,  
Surrey

My dear Principal Dawson

I meant to have drawn  
your attention last Wednesday  
Evening - but it escaped me,  
to the description & figure of  
the Nova Scotian *Ectheria*, from  
Boston, in the Geol. Mag., for May  
p. 220, pl. 9, fig. 15. The separate copies  
of the paper (in which there are a few  
errors to be corrected by pen in the  
copies I will send out) are not

yet supplied to me, - & in  
the meantime I offer you  
a clean proof of the plate  
"Before letters" - for your portfolio  
of Geol. Sketches &c.

I trust that occasion will  
be before long of figuring the  
Beypichia of Nova Scotia from  
George West's good sketches - &  
those of New Brunswick also - which  
are very fine & worth better figures  
than were given of them in the quad. Nat.
