

St. John's Maine Nov 6th 1870.

Prof. J. H. Dawson:

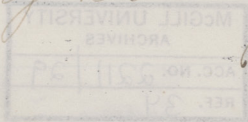

Dear Sir:

Your favor of Oct 15th came duly to hand. I will send you in a day or two the specimen which we think may be a spike of *Fern* + perhaps one or two others. I will send them by mail or by express. Whenever the favor is returned you can return them all together to this place.

I do not know as I have any new scattered plants of which I have duplicates that you would care to have. Mine are principally Ferns, Calamite, Roub + impressions of Bark of various kinds &c.

Yours very truly

W. A. Merrill
