

50, Lombard Street,  
London, E.C.

March 6, 1871.

My dear Sir

I will try to discover  
your son & regret that I  
did not before know or heed of  
his being here. I sympathize  
with you in your contemplation  
of the taste of getting up there?  
the drift but I think I  
papers in the last No of the  
I Journal most useful - Dr

Brown on Ice Work in  
general for the special  
& Dr. Rance for the Prob  
special. I think the chaos  
is beginning to be reduced  
into order & you will doubtless  
help in this. I expect ~~if~~  
we shall have soon have a  
review of the papers in L.H.  
I will insert a notice rather  
than a Review in the Freeman  
just to open the ball  
Yours faithfully  
D. Dawson J. R. Pattison

Thanks for your paper. That  
on Paramerifer was the more  
welcome as I had just heard  
A Jones lecture on these marvellous  
forms.
