

Hanover N.H. Apr 24 1871

Princel Dawson.

Dear Sir

You kindly
sent me a copy of your map of Nova Scotia
two or three years since for my Geological Atlas.
At last after much delay the prospect is good
of the beginning of the printing - If you have
had occasion to improve the part for N.S.
~~in~~ since its publication, it would confer
a great favor upon me, if you would send
me such corrections for publication in
this atlas - and it would also be a great
favor if you could write a few pages des-
criptive of the salient points in the Geology of
the province. I have had very valuable contri-
bution from Dr Hunt as well as from the
leading geologists of the country. I know
that you are very much occupied - but I have
discovered that it never does any harm to
ask questions. We adopt probably lines, and
symbols instead of colors - so that the map

can be made as minute in its denig-
nations as can be drawn by a pen

Respy Yrs
