

McGill College.  
Montreal.

May 12/71

My dear Sir,

I have received  
yours of the 3d inst.,  
and note its contents.

I shall hold  
myself in readiness to  
be in Charlestown  
as early in July  
as possible unless  
otherwise advised  
by you, and shall  
endeavour in the

mean time to look  
over what is known  
of the Geology of Prussia  
Edward Ford with  
the view of preparing  
a plan of proceeding  
most likely to secure  
the desired informa-  
tion.

I shall write  
to you before leaving  
and should I find  
it necessary in the

mean time to ask  
for any further guidance,  
I shall be happy to  
avail myself of your  
kind offer.

I shall take it  
for granted that the  
best maps of the  
Island can be ob-  
tained in Charleston  
and shall be glad  
to be introduced to  
any local geologists  
surveyors or others who

Copy to Pope

may have information  
a specimen that  
would throw any  
light on the ob-  
jects in view.

Very truly yours  
W. Dawson
