Principal Dawson

My dear Sir

I thank you for your kind note, and for the address of Mr Murray.

As to the height of our New Haven ^{+ seashore beaches} terraces, I have been making it the subject of special study for the past two years; and hence the degree of confidence which I have with regard to it. Moreover, as the terraces on the Connecticut increase in height from the Sound to Middle New Hampshire, showing they

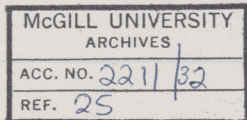

as you go north an
approximation, ^{in height} to your St.
Lawrence sea beach, I do
not see any occasion for
trouble or doubt with referen-
ce to it.

You will find in our Feb'y
no. that we have quoted ^{from} further
from King & Rowley. But in fact
the whole was set up for our
Jan'y no., and so stood, until
we found that we have over-
run our number, and had to reduce
it. Hence this second notice
will not be taken as evidence
that we are here becoming
altogether sceptical about the
Ozone. The part now cited is
the Appendix to ~~the~~ paper, and
it seemed to have especial
interest to Americans as it
treated of the minerals of

some American localities.

Our March no. is already full, and we have nearly enough copy on hand for our April no. - We will give your paper a place in the latter with pleasure - that is, provided it is not too long - in which case, it can be divided. We have already so much matter on hand for the April no. that we hope yours will not require over 8 or 10 pages.

Yours very truly
James B. Dana
