

Mosley St.,
Newcastle-on-Tyne.

Aug: 3rd 1871.

My dear Sir

I am just about to start
for a very little time in the United States
- I purpose to sail by the Russia
on the 12th & therefore hope to be
- New York of about the 22nd & 23rd
- It has struck me that I might
possibly compass a visit to
my journey - though I am not at
all sure. Still I think I shall
put a specimen or two of *Parkesia*
in my portmanteau on the chance
of being able to extend my travels
so far. However it strikes me as

possible that you might enjoy
your vacation away from home &
this of course would $\frac{1}{2}$ naturally influence
me

I have two or three other things
I'd like to talk over with you.

Would you write me one line or
two of this direct Poste restante
New York just to say whether or
not you are likely to be at home,
about the beginning of September.

- Do not enter one single note
of any of your plans for me as
it is quite possible I might be
entirely prevented coming. In this
case I would send the specimens
you wish of Parker's from Boston

is an excellent place to rail. I can inform
you ~~in~~ ~~the~~ specimens - the non-~~in~~ ~~the~~ and
perhaps show not one for myself.

Just Dr. Edwards on Tuesday last in
Birmingham - he looks well but is much aged even
he left England

Bellevue and Geo. Dr. Dawson,

Washington D.C.

Henry B. Brady.
