

G. P. Osler

Ottawa Oct 12th 1871

Dear Sir

You will find
per same mail a sample
of what is termed here - quartz
of Phosphate of Lime - I wish
you would do me the favor
to try it, and note the value
and if possible give me a
hint the way it should be
worked also whether you think
it valuable, & worth manufacturing

I got this piece &
some other samples from a
man who owns a large tract -
same as sample sent you

and he offers me a share
if I can get it into good
working order, and as I can
spare time from my office
I will try what can be done
if you think it valuable enough

Yours very truly
Geo. T. Blip
