

Dr Grant
Ottawa Jan'y 29/72

My dear Sir.

I trust you will excuse
my forwarding to you the
inclosed document from
the Royal Society. I may
here state that a few months
ago I forwarded to Sir R. Wallace
M.S. a paper on the Cystides
of this section, chiefly a review,
with particular reference to
the *Comarocystites punctatus*

The entire remains of which
I was fortunate enough to make
out, fully three years ago.

Having labored chiefly
in the scientific department
of the profession of medicine,
and being advised by some
kind friends I thought well
to enter for the high honor
of the Royal Society. In
bringing about such the
names of at least three

Jellows (personally acquainted)
are requisite and on that
account I now seek the
Co-operation of yourself
Sir William Logan and
Dr. McHunt. I hope I am
not asking too much
of you to fill the form as
you think best and then
forward it to Sir W. Logan
and Dr. McHunt. Inclosed is a list
of my Chief medical and

and Scientific Contributions.

I would also feel thankful
for a note from any F.R.S at
home who would assist in
forwarding the object in view.

Trusting you will excuse
the trouble I am giving you.

Remain

My dear Sir

Very truly yours.

J. A. Grant

D. Dawson.

Montreal.
