

Copy to Dallas

M<sup>c</sup>Gill College.

Montreal.

Sept 6, 1872

My dear Sir,

My attention has been called since my return to town, to a paper in Queensland Journal of Mr. Caruthers, in which he represents me as withdrawing statements published in the Proceedings of the Society, which I have not withdrawn, and which the specimens in my collection and described

and figured by me do not  
allow me to withdraw;  
and, <sup>in</sup> which he mixes  
together distinct types of  
plants in a manner  
unexplicable to me  
unless by the indistinctness  
of my descriptions and  
figures of things most  
different.

I do not wish  
to raise any controversy  
on these points, more  
especially as I am

now preparing to illustrate  
fully in another way  
the points in description;  
but I presume I may  
ask the Society to allow  
me to deposit in its  
Museum and Microscopical  
Catalogue in its  
Journal, untouched  
photographs of my  
specimens of Leptophleum  
and Lepidoblenus jussianus,  
and which will thus

THE NEW YORK  
BOTANICAL GARDEN  
GEORGE ENGELMANN PAPERS  
1845-1850

desire to give correct  
information to any who  
may study the subject.

I shall try to have  
them prepared in so  
as I can find a little  
leisure; probably in time  
for some of your earlier  
autumn meetings.

Yours

W. L. Dallas

W. L. Dallas, Esq.
