

Pictou 22nd May 1873

My Dear Sir

Mr Holmes thinks it will be impossible to get a square mile of reserved area to work on 46. there being a number of few reserved Grants there. He thinks there may be a third of a mile of limonite which would be valuable by itself if we cannot get more. Please get the surveyor on the property as soon as possible and send us as early as you can the description of the two areas to be taken for the Rights which expire on 4th & 5th Profine as we are delayed in making out the Transfer to Perpetuity until these descriptions are received:

Dr Dawson
