

Monday 17 August 1879

My dear Dr. Dawson

I have received your letter of the 13 Instaut, and have ascertained that Mr Weston will be permitted to accompany you to Cape Spence, if he should be here when you go. He is at present on Lake Temiscouata looking for fossils in the rocks of the great band of conglomerate at Black Point.

Mr Paulow has done what is required to the Laurentian

leave it in a ^{open} drawer of
my desk.

We have looked over all
the cuts at Lovell's & have not
been able to find the Laurentian
sections. You will have to
employ Wether to engrave
a new one.

Tom Cantino in respect
to science shall be attended
to. However I shall not be
much in London & am not
likely to be interviewed.

Mr Grant & I start by
afternoon at 3.45 for

New York

Dear Sir

J. E. Logan
