

Recd copy  
of the letter

Dear Sir

Nov 29 1848

Your letter of 24th

Articles addressed to my  
Dr. McPherson & arrived here  
on Saturday and as a open air  
letter came here & perfect  
receipt of yours than I am asking  
Receipt.

I have printed the  
letter to Dr. McPherson & have  
to day and have no doubt  
he will copy as far as possible  
in the week time. Truly  
that he cannot but collect  
to Major Curran in the  
well known what was  
carefully gone over and  
appeared to be correct  
He updated the directors of  
the Museum to give the  
book into the hands of  
as kindly as you can  
as follows to the well known  
& back to you, except marginal notes

As a Account, Many the  
appear that it will be  
appearing the sum, but  
in long that the several  
year will be long he  
at our Committee with  
Major Cameron - say a  
man in the mean time  
with the rest.

The number of papers  
has no doubt exceeds the  
usual estimate but please  
see that at the several  
times when I think upon  
debtors a few more should  
be that they were charged the  
first time the amount will  
have been little over  
\$600. Certainly the amount  
exceeds my say calculates  
but I think the purchase  
of the two millions there  
will have the means of  
covering debtors collect with

he arrived in the  
city,

I shall look into my  
own papers to see if there  
is anything for  
insertion.

My opinion in the  
matter would be for the  
first to settle the matter  
amongst the Herald  
people on the basis of  
a few years for the  
bank, and as there  
they are public reports of  
the first bank which  
with marginal notes  
might be used as evidence  
where this might seem  
as claims of adjustment.

The work was un-  
doubtedly well done

by the Herald people;  
but they took their time  
to it so as not to give  
any other papers a chance  
of a good article just  
a system will be  
successful support of  
the press.
