Montreal

Dear Sir

Your letter is received and I am pleased to find that the Expon was of some service to you. - I now write to say that I have just heard of a new locality in which the dolomite is replaced with "pink limestone" and will if possible this winter obtain specimens which I will share with you. - I expected you would hardly agree with me about the Anemones? and will therefore take the first opportunity of sending you another which I was afraid of being lost in transit, which I think will, or at least I

hope, will make you agree
with me, that it is not a
concretion, - I feel satisfied
if you could see them in situ
it would be convincing proof
that they must be fossils. -

Yours respectfully
W. M. Davis
