Toronto, Dec 28 1875

JW Dawson Esq
Dear Sir

Misses Copp & Clark have sent me on their own account a copy of your deeply interesting book "The Dawn of Life". I have read it with great pleasure and have written a review, which will appear in Feb. no. of C. M. Mag. & I will send you.

I beg to thank you also for copy of your Detroit address. Please accept Jan'y No. of Mag. in wh. I give the substance of Southalls Book on the Bent Origin of Man. I read the paper before the Canadian Institute. It led to a short discussion. It is, I know, opposed to the prevalent opinion among scientists, and perhaps the subject must await further light for its elucidation.

I remain

Yours very truly
W H Withrow
