

Natasha, Va., Dec. 31, 75.

My dear Sir,

I beg to tender you my most sincere thanks for the three pamphlets you had the kindness to send me & which I have read with the utmost pleasure & interest.

No more needed contribution to the Agricultural Literature of the Union could be made than a paper such as your "Improvement of Agrie." written for each of the large geological divisions of the country.

Yours, very respectfully,  
A. Gerard
