

March 22/76

I have much pleasure
in testifying that Mr
Joseph William Spence
Bachelor of Applied Science
of this University, took
high standing in the
Classes in Natural Science,
including Honours of the
First Rank in Geology,
and that he has sub-
sequently had much ex-
perience in field-work

on the Geological Survey
and Mining Surveys,
He is a young man
of much energy and
perseverance, and des-
tined to the pursuit
of Natural Science,
and would I think
be a very suitable
person for a Science
mastership, for which

junior Lieutenant he
is a candidate in the
Naval School to be
established in London,
return.

W. Wilson, H.D. 7/18
Principal
and Prof
of Geology
New College
