56. Liverpool Street
King's Cross London N

May 19th 1876

My dear Sir.

I have made arrangements with a member of the National Secular (Infidel) Society of London to enter into a debate for early publication, The abstract proposition is "the Existence of God as described in the Bible and taught by the Church of England" but doubtless the real question at issue will be the reliability of the Scriptures and the truth of the Christian Religion. The debate will be widely read, and I am therefore anxious to adduce all possible evidence in support of my cause, and confutation of the Atheistical

sophistry of my opponents, but as
my means are limited I am
obliged to ask the assistance
of my literary conferees. in giving
me some of the needful information
your works;

"Life's dawn on Earth."

"Acadian Geology"

"The Story of the Earth and Man"

would render me great service
as Geology will be placed on the
antagonistic to God.

I have ascertained your address
from Capt Petrie of the Victoria Inst.
here - who has obliged me with the
Society's transactions - and believe
that you will be interested in my
labours, and willingly render me
all possible assistance. I beg to
ask that you will kindly instruct
your publishers to forward me
early copy of the works named
above

Kind reply early and
believe me, with respectful
in regards

Yours very faithfully

Henry R. Taylor

D. W. Dawson Esq LL.D.
