

North River. June 25<sup>th</sup> 89.

Dear Sir William —

I must express my deep regret at not being able to send you a specimen of Tylo-  
dendron, such as you asked for, before this date. However, I have just been to Gallas Point and ~~fortunately~~ procured two specimens attached to parts of the external woody cylinder. These I have the pleasure of sending to you. I also send a calcified specimen which I think may(?) be a portion of the external trunk of the same tree. Was this a complicated Sigillarioid trunk?

Truly yours,

Francis Mearns.
