

Albany Oct 15 1890

Sir Wm Dawson

My Dear Sir

The material enclosed  
is all from the Styrola layer  
of the Genesee unless otherwise marked.  
I wish to call your attention especially  
to two pieces from the Naples beds  
the only specimens I have found in them  
which show the woody structure. They  
are not very well preserved but  
if you can make them out I  
should be much gratified to  
get your opinion concerning them.  
Please return all the specimens

Very Truly Yours

J. A. Clark
