

111  
Wlop  
Pitts June 28/76

Dear Dr Dauson

My Mother and  
Sisters join with me in  
offering our warmest  
Congratulations on the  
happy event that  
has so lately taken place  
in your family please  
convey our kindest  
wishes to Mrs. Harrington  
My own sister Anna is  
to be married on the 11<sup>th</sup>  
of July to Mr. Alcock  
You will likely remember  
his father who has long been

connected ~~with~~ our church  
here. Knowing the interest  
you take in the researches  
at Polsons Lake. I now  
have to advise that Donald  
Graser went down there  
on the 12<sup>th</sup> inst and on  
the 23<sup>rd</sup> he reported he  
had found the lode, it  
is the same that was  
discovered by McLean & Co  
in 74 and is in close  
proximity to Graser's boulder  
found in 73. Graser is  
now sending down a  
working shaft which  
should be to the ore by  
this time. he says

"I am not yet able to define the  
"position of the lode. I only know that  
"the rock or wall on one side is the  
"band of olive shale or light green rock  
"not showing strike and very probably  
"I was close to the lode before on the  
"reverse dip. See G. M. Dawson's report  
"to Ad. Hos. I cannot yet account  
"for the position only by being acted  
"on by the antiferret and should  
"thus be the case you may look for the  
"discovering of the outcrop of the reverse  
"dip of the lode. as all the indications  
"seen when I am now at work are to  
"be found when I was last at work  
"before and of much larger dimensions  
"the distance apart of the two planes  
"is less 120 yards" - The pit is dug  
"Grasse or I will keep you advised.

I am sorry to say Mr. W. D. Davis is  
in a dying state today. Soften of the  
brain is the trouble.

With kind regards to Mrs. Dawson  
and family I remain yours very truly  
W. S. Ross
