Joggins N.S., Aug. 28. 76

Dear Sir,

I despatch to your address today per I. C. R. and G. T. R. a box containing the reptile bones, Pupae, fish remains, and Calamites to left to be forwarded, with a small hand specimen of Cambrian Coal. I trust that it may be received safely about Sept. 1st. The weather is becoming quite favorable for operations on the remaining big stumps which I will take the earliest opportunity to explore.

I am dear Sir,

Very faithfully yours
W. Dawson Albert J. Phil
