

Ware Priory,
Herts.

3rd Oct 1076

My dear Sir

This days post has brought your letter of the 15th ult enclosing your very kindly intentioned specimen of "Choristes elegans, Cr.;" but unfortunately it was smashed to pieces. The letter box was too slight & thin to resist the stamps. At the same time I am equally obliged to you for sending it to me.

As to Torellia vesicaria I have only the original.

specimen which I described &
figured, besides a young one
belonging to Dr. Friele &
dredged by him in deep
water on the Norwegian
Coast, & a young specimen
from the Perseus' Expedition.

I now send for your inspection
& comparison Dr. Friele's
specimen. Be so kind as
to see that the letter is
registered when you return
the specimen. I wish I
had one for your Museum.

Believe me
Yours very truly
J. J. S. S. S.

J. W. Dawson Esq. D.D.
