MCGILL UNIVERSITY ARCHIVES	
ACC. NO. 2201	55
REF. 29	

My dear Sir

Your first account your letter from Boston - was very glad you are coming to Halifax -

The "British Agent" is not a Scientific Man and is afraid of Scientific Men - and I rather think afraid of what I have written - I would my paper to be referred to you - to have your opinion on it - that is on the points about the Coast - & the Sea area of the N.S. & all of which I wish to see more particularly pointed out

Handwritten text on the reverse side of the page, appearing as bleed-through from the other side. The text is mostly illegible due to being mirrored and faint.

When I have the pleasure  
of seeing you - I should wish  
to see you and explain  
before you give an opinion  
on certain parts of the  
paper - if they refer to you  
I will show them to  
No. and think they will -  
But the 'B.A.' is a diplomat  
and trusts too much in  
that sort of merit - he  
appears not to think much  
of science - But you will  
send out all this when  
you come here -

They are all at the Waverley  
and you will see the whole  
set them - Prof. Baird  
and a lot of others are  
coming in about 3 weeks -  
On the whole we are

to have Walker's Lewis letters - but  
what you send about 8 months ago  
was a letter - is perfectly true -  
and of their plates have no observations  
of taking when you are -

Very truly yours

Henry D. Meade

There is also a letter from Walker  
about my paper on 'Pan Tse' it is most  
interesting and complimentary -
