

probable age, and the different phases this earth of ours has gone through, - especially before man - of this last was always dark to me; I had never read, or heard any explanation of the subject before, and now I seem to get a glimmer of more light since reading your Book - I again tender you my warmest thanks for your valuable present.

It will afford me great pleasure to hear from you after an examination of the two stones sent you, which I hope will be the means of still farther adding to your own, & others' knowledge of the remote history of Acadia.

Yours
Dr. Harewood

Dear Sir,

I received your letter of the 3^d with enclosure for which, & the Book especially, I tender you my sincere thanks.

I am extremely sorry I was not able to look over the place where I got the tree - I went down on purpose, but unfortunately the tide was full, and I left the jogging the following morning, and came on fire.

Your Book, so far as I have read it, yet, has been to me a rare treat, opening up, as it does, so plainly for me newer and wider ideas, than I ever dreamed of before, as to the
