

to collect the Schorran
may be a convenient specimen
of your Eozoin rocks of Har-
adon.

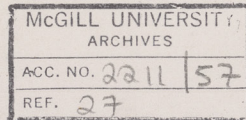

I found large patches of
spar among them but had
no time for careful examina-
tions. The view from the
falls appeared by the way of
Plebe Brooks - a tributary -
exhibits a wonderful exposure
across the mountains nearly
equally by way that
I have seen since the winter
last.

I am dear Sir

Very faithfully yours

Albert I. Bell

Dr. Hauser

My dear Sir

We are disappointed by Mr. Keaton
leaving for Montreal before
my return from Cape Breton
by which I had hoped to form
some views I now read by
Esopus in a special address
with Harriette a few bones
found collected by my V. Brothers
Arthur at Plebe (Bass Lake)
Cowboy Cape Breton, and a
piece of the Spar from the
Logans.

I am sorry to say that up to

The present I have had an opportunity of collecting from the Westworth museum though should I be able to spare time I propose still to spend a day or two there on my own account the results of any to be immediately placed in your hands.

Mr Fletcher now of Cape Horn - of course. But the most interesting information we have that he has lately brought down is a large collection number of primitive development of true Grasses that fossils in the Llanabry above Ewenny Falls of the museum near Wrexham Mr Bealton has specimens which in his opinion place and which as it appears

them works very low, I think, in the Silurian.

We had of course no chance of finding any fossils over the Cebyquid though I met several miles back of Fern Island some old fossils in the form of Spermoides Ferns and Cordaria or coal or true coal groups with which they are two small leaves

of coal. But the most interesting information we have that he has lately brought down is a large collection number of primitive development of true Grasses that fossils in the Llanabry above Ewenny Falls of the museum near Wrexham Mr Bealton has specimens which in his opinion place and which as it appears
