Prof. J. W. Dawson.

Dear Sir: I have received the specimens of zoogon which you so kindly sent me. Please accept my best thanks for them.

I have not yet made use of them, for the reason that I want to learn from you, if possible, the best way of preparing them. I have been accustomed to grinding thin sections and mounting in balsam. If there is any better way to show the structure I would like to apply it with these pieces. I ask because my slides thus far certainly do not show the form in a satisfactory manner, although some of the structure described is surely to be found.

Trusting you will find it convenient to give me a few hints. I remain

Very resply yours

R. Hitchcock
