which require correlation. We had
 a pleasant & not unprofitable time
 at Dublin. You will see the proceedings
 at large in Nature & the Journals - I
 sent one day work as reported in the
 local papers. Mr Southgate has just
 sent me his lecture ^{at} the opening
 of the Lewis Brooke Museum - Univ. of
 Virginia. It is his mammoth God - & is
 a little too advocate-like. He is perhaps too
 confident when he has no personal or
 original knowledge but is a good
 summarizer.

Yours faithfully

M. Pattison

Dr. Dawson

My dear Sir

I am interested at finding
from your note of the 8th that
you still discover new charms in the
old lore & will be able to look on
new matter to the question of present
importance - the pedigree of life-forms.
Dr. Bisp's *Thesaurus Deconico Carboniferum* -
is a good magazine of material waiting
for discussion. Doubtless you have Nicholson's
book (*History of Life on the Earth*), &
there are, as you say, unnoticed manuscripts
