

Albany, October 26th 78

Barrow

Dear Mr. Barrow

The part of your collection you showed me, made me very desirous to see the rest of them; unfortunately I remained longer time than I thought in the Ottawa region, and I could not stay in Montreal as I intended, in coming back.

I am arriving in Albany, where Prof. J. Hall was waiting me, for an excursion in the Catskill mountains.

I have made very interesting sections in the Laurentian of the Abernethy Township, as in the neighbourhood of Tapscottville, St. Lawrence, where I gathered a full load of *Sejourn*. I feel deeply obliged to you for all the scientific information you have given me during this week, both in your cabinet, and in the field. Very very cordial

Thanks on that account.

I send you by the Post-office
my last paper on the cretaceous beds
of Ardenne, than I had with me
in my trunk; it will be for me an
honour to send you my other papers
next spring, when returned in Europe.

Please present my respects
to Missen Dawson, and to your
family, and believe me to remain
yours very respectfully

Ch. Barrois

Rue Rouelle 37 (Lille) France
