

Hunt  
Naples

Dear Dr. Dawson

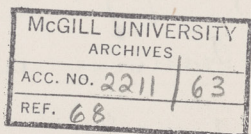

I shall be glad  
to say something at the next monthly  
meeting of the Nat. History Society as  
to my journey considered in relation to  
geology. - say "geological notes of a  
summer in Europe" - I shall hope  
soon to have the pleasure of looking  
into see your glaucerites etc & to  
give you the remarkable results of  
Renard announced by letter just  
received. as to the red muds  
from great depths in the sea, which  
are essentially made up of silicates  
crystallized in place. and mixed  
with oxyd of manganese -

But of this more anon.

With best regards

Very faithfully Yours

J. Perry Hunt

Principal Dawson.
