

Kiel, Zoological Museum,
Dec, 8, 1878.

My dear Sir,

I am in possession of your
two letters, the photograph
of a weathered specimen of
Eozoon canadense and
a fragment of *Eozoon* you
have kindly forwarded
to me last month. I have
also received a copy
of the "Life's dawn

on earth" from Messrs
Hodder & Stoughton,
London. I thank you
for your kindness. I
wished I could agree
with you in reference to
the nature of Ezoon,
as I have said already
in my paper p. 189.

If you may be so
kind to send me slices
in which I shall find
full evidences of the
animal nature of

Eozoon, I shall not
hesitate to confess
my errors. In all
my studies in the first
way I endeavour to
find out and to declare
the truth.

All you may bring
before the scientific world
to rectify my explanations
of the structure of
Eozoon, I shall consider
with the greatest inter-
est.

Yours truly
K. Moebius.

Maibens
