

Princeton Review.

47 Park Avenue, New York.

Jan 11. 79

Dear Dr. Tarsan

A short scientific
article such as you
propose could be used
to advantage.

I should be pleased to
receive it at your convenience
but can not say positively
at this moment that it will
come out in the March no.

for which we have a variety
of matter.

Please give me a shortened
title for the little page,
if it is possible

With the best wishes
remain

Jones M. Sibbey

See that you prefix a "Rev." to
my name, but I have no
claim whatever to this dignity
