

Manufacturers in the North & West will have lively
wishes supplying the wants of consumers. If the
Monarchs they wish to do anything with the States
one they should make accommodations. If they do
not hear the British Captains will be looking out
for one here especially the Holland Company. If
something is not done to help the Negroes of the
West Indies and Spain to improve their
lot then as they are all already subject to the
same for not being provided with anything is done
upon the Government may interfere should other
opinions apply to mark the case. It would be well
to mention this to Congress by your friends it would
not be deemed an interference.
My father's friends please
to send me the same all
Yours
A. M. 1772

Pumping

have observed in the newspapers the
Sale at Auction under foreclosure of
the Mortgage of the property & plant of
the Pictou Harbort Light Coy. fortunately
for the shareholders enough has been
realized to pay off the Mortgage and
all other claims and a small sum
over. I believe part of the real estate
was not covered by the Mortgage & will
probably soon be sold at Auction
when ^{the} accounts will be closed
and submitted to the shareholders.
The Treasurer tells me the prospects are
that 10% or $\$2$ per share will be left
to divide among shareholders but
this will depend on the expense in-
curred in winding up the Coy's affairs.

Notice the proposed duty on
manufactured Iron is $\$2$ on Pig - $1\frac{1}{2}$
on bars and 15% on Rails. We hear
the honours of the Coy not only find sale
for all they are producing but are
unable to meet the demand. If
the above duties are confirmed -
