A. Bruce

16 Carlton Street

Dist. 7 July 1879

My Dear Sir

I beg to acknow-
-ledge yours of May 29th which
reached me in due course
The box also with the specimens
has come and thanks to your
care and Mr. Williamson's
they are all safe and right
after their travels. I feel
much indebted to you for

The trouble you have taken
in going over them - they are
so imperfect - and fragmentary,
that in hands less skilful
than yours nearly the whole
of them must have been
useless and I am afraid
you must have found it
more a trouble than a
pleasure to examine them -
I am glad however that

you found among them one
or two points of interest
- especially that of the
Pithecolobites

Please accept my thanks
for your valuable notes on
the Scottish Devonian - Plants
which I have read with great
interest

There is a long paper by
Prof. Geikie in the last Part

of the Transacⁿ of the Royal Soc. Edin
(Vol ~~XXVIII~~) on the Old Red For-
-mation of Scotland which
is well deserving of notice
though rather too theoretical
for my taste - It contains
an elaborate discussion of
the subject -

Again thanking you

I am

My Dear Sir

Yours faithfully

Thomas Brown
