

Manchester O., Sep 2, 1879

My dear Sir:

I mailed to you today a copy of a little Geology for beginners. Especially adapted to our Interior States, You will see your name frequently quoted. The work cost me much labor, for I reviewed all the Reports & publications bearing upon the Geology of the Interior. Of course very little of this could go into so small a book, but the study did me good. The venture has been kindly received thus far & is being rapidly introduced into our Western Schools.

I notice in the Sep. Jour. of Science that Prof. Albee's reply to your art. on the Eozoön.

With kindest regards -

I am very truly yours
