

In Mr Jones

Halifax N S W  
1879

My dear Principal

I had pleasure  
in receiving your letter  
& the testimonials on  
behalf of you I see  
which are certainly  
most ample and  
satisfactory & evince  
wisdom I have no  
doubt his unanimous  
approval to a

chain in Jackson's  
College if a chair  
were vacant or  
we had the means  
of forming a new  
one. But the proposed  
chair of Physics,  
founded by Mr. Williams  
was filled some  
time ago by the ap-  
pointment of young  
Dr. Grier as you  
will see by the pre-

ceedings at our con-  
vocation which I  
send you to day I  
I am afraid we have  
lost hope of another  
\$40 or 50,000 to pay  
a Professor of our  
giving in which  
capacity - many others  
of the late donations  
I would be delighted  
to see you here.  
Whether the College

wants will be  
renewed at the  
next session of our  
legislature is very  
doubtful not for  
want of will but  
of means, and  
the friends of Pal-  
house are looking  
ahead to be if  
possible independent  
of this aid.

With kind regards  
to Mrs. Dawson, daugh-  
ter & sons, believe me  
Yours sincerely  
W Young
