

St John N.B.
1 Dec 1879

Dear Sir,

The work done
by me last summer
in the interest of
the Geological Survey
and I do not feel at
liberty to offer the results
for publication till it
has first been reported to
the Survey office. I will
not have time to put the
observations in shape till
toward spring. Mr. Wells
observations places the
Woodstock ore deposit in
the Calciferous slates, all the
fossils of which described by
