Prof. J. W. Dawson.

Montreal, Canada.

Dear Sir:

Two papers published by you, I  
am anxious to obtain.

"Microscopic Structure of Stromatoporidae,  
Supplement of Acadian Geology.

The former I am not aware is for sale.  
The latter I cannot obtain here and as I  
have the Acadian Geology I wish it. Will  
you be so kind as to inform me if it is  
to be obtained and at what place?

My field of work has been changed  
from New York to the Colorado Valley in  
Utah & Arizona. I have just returned  
from a seasons work on a special section

from the Tertiary to the Primordial. Hope  
to give 18 months field work to related  
sections in the valley and canons of the  
Colorado.

Shall still continue  
my work on the structure of the Trilobite.

Just before going west I mailed to your  
address a paper on the Utica slate & its  
fossils. Metamorphoses of *Lionothus Becki* etc.

I remain

most respectfully and truly,

Your Att., Servt.,

Chas. D. Walcott.
