Prof Dr J W Dawson

Montreal

My dear Dr Dawson

I know it will interest
you to learn that during a flying
visit here, I have obtained from
a friend a new variety of
Syringium from Michigan which
occurs about 4 miles from
the old locality and in this
case appears to be (I am told)
a new one, but the fossil seems
to be either "Reussellia" or a
sort of "Reussellia" at all
events it is different from
"Petite Reussellia" but I will have
pleasure of submitting you specimens
in my return to Montreal. I
have also heard of another form in
New York, but have not seen it. It is
said to be well preserved but in some way
hard to see.

Yours W Morris
