

Rio de Janeiro,
July 5, 1880

Dr. J. W. Dawson;

Dear Sir,

Having just received some fresh material from the Serra de Crumarama I beg leave to trouble you once more. I send by to-morrow's mail a better specimen from that locality together with one which is supposed to be from the province of Ceara' and which looks favorable for Eozoon.

Should this material prove more satisfactory than that formerly sent I should feel greatly obliged for a note on the subject.

Yours truly

Orville A. Derby
