

McGill College.

July 30/80.

My dear Mr Macmillan,

Allow me to enter
due my son Dr J M Dawson
Asst. Director of the
Canadian Geological
Survey, and a man
who knows more than
perhaps any one else
of what is worth knowing
in our great Western
Territories.

I specially wish him
to explain to you

what I am preparing
as to a work on Canadian
Geology, if I can get
the Canadian Geology
disposed of, and to
arrange as to the
best mode of getting
rid of the remainder
with the exception
of a ~~hundred~~^{fifty} or so
which I would keep
& give away ten

Friends,

He might also connect
you as to the publication
of a work which I
have in progress on
Pulawsoic Arctic heathens,
being an account of
the oldest Sand knives
knives, and of some
interesting points as
to their modes of
life and the mode

of occurrence of their
remains.

With all kindest
regards

Yours sincerely

J. Dawson
