4, Pulleney Buildings,  
Weymouth.

My Dear Sir.

In reply to your favor of Dec 22. I enclose you one of my circulars in wh. I have marked Tertiary fossils that I can recommend you as being in fine condition having lately replenished my stock of them. It is difficult to put a price upon the Secondary fossils as it will entirely depend upon the species. If you w<sup>d</sup> say what amount you could assign to particular formations I would tell you what would be included. of course there a good coll. of heavy as I am within 2 or 3 hours of Lyme Regis. Both Permian fossils are

now seldom found - I think though I  
may shortly be able to supply you  
with a coll. direct from Perm, having  
relations with the Kazan University  
Museum - I was there last summer  
and purpose renewing my visit in April  
en route for Western Siberia.

#### Cambrian Wales

Have had two workings here but the  
Museum has taken nearly the whole  
collection. This summer I shall have  
further operations - Fossils though are  
rare except in fragments and most  
difficult to get as the beds are not  
worked for any purpose and it is only  
by blasting that any specimens can be  
found. Devonian

Having had a collector for now four  
years in Scotland I have the best

collection yet made from the  
Orkneys - Caithness - Sutherland  
Forfarshire -

Up Cretaceous Lebanon  
I should like to supply you with  
a coll. from this locality as the  
specimens are beautifully preserved.

I judge the Eoxoon you can  
send me is on private account  
and for wh. I shall be pleased to  
send you fossils

I think you will find my fossil  
shells and recent should you  
want any types or geographical sets  
better than those of our late friend  
Dr P. Carpenter as he was restless  
anxious about the condition of speci-  
mens than their correct determination  
Should you favor me with an

order within the next few months  
I would like to have it as soon as  
you can as I expect to be  
absent from the end of April  
to some time in July though  
I have my son to attend to  
ordinary demands

I am

My Dear Sir

Yours truly

Peter Damon
