

Jates Co.
Penn. Jan., N.Y. Jan. 10, 1887 -

Dr. J. W. Dawson,
Montreal, Canada,

Dear Sir: I am preparing some notes on the Geology of Jates Co., N.Y. to be published in the Regents Report for this year and would be glad to know something of the new Equisetes (Wrightiana) which you proposed to describe and name after me.

If the description is published I hope you can send me a copy, otherwise will you do me the favor to state its affinities and for publication? If it is ^(the description) published we would like to re-publish it, ^{or an abstract} in the report, with your consent.

I will make up a box of fossils for you as soon as I get time - this winter hoping that I am not asking too much and remembering all past kindnesses,
I am

Very respectfully

Your obedient servant

Perlin H. Wright.

P.S.

What disposition did you make of the specimen (from the Hamilton Group) which Dr. Whitfield pronounced Syoceras livatum, Hall - and you "dictyophyton (probably a new sp.)"? I have since made sections of one and am absolutely certain that it is not chambered - B.H.W.
