

Wolville, N.S.
Feb 7th 1880.

Dear Sir.

The copy of the Lecture notes, which you very kindly promised me, I received the Thursday before last, & am very much obliged to you for the gift - I shall be happy to recommend it, to the students here.

My class-work is going on as usual -

You kindly offered to speak to Dr. Cramp, or any one likely to have some influence about the unpleasantness which has arisen, but I thought I had already given you a good deal of trouble, & at the same I knew that their religious views were too intolerant to permit them to exercise their reason in the matter.

I have been thinking of applying for a position on the Geological Survey, & intend writing to the

Waltham, N.Y.
Feb 14/1884

Dear Sir

I have been thinking of applying for a position
on the theological library & intend writing to the
hon. secy. in the matter.
I have not too intention to present them to you
of course, but the same I think that this step
thought I had already given you a good deal
the importance which has arisen, but I
may not wish to have some influence about
you kindly offered to speak to Dr. Davenport
My class work is going on as usual -
I am happy to recommend it to the student body
much obliged to you for the gift. I shall be
I received the library before last & am very
water which was very kindly furnished me.

Director - There is a great deal of work to be done
in the Western Counties of Nova Scotia, & also one ^{from the Survey} is
attending to it at present, ~~from the Survey~~. If you
think there is a possibility of my receiving an
appointment, would you kindly interest yourself
on my behalf. - If the idea of carrying on the
explorations here, is not considered of sufficient
importance, (although I think it is, judging from
the number of copper, & gold mines, which are
being opened, & also from the specimens which
I have had sent in for examination) - then I
would like an appointment for some other
place, although for a variety of reasons I would
prefer to explore in this neighborhood -
I am quite sure, if you were here, to examine
into the state of affairs, you would understand
how contemptably they have acted here.

In the meantime I remain

respectfully yours
Geo Kennedy.
