4, Bulleney

Weymouth.

My Dear Sir

Yours of the 9th inst just
to hand - For the moment
I only write to ask you to
name some shells either specif-
ically or the shells of some
particular region that I
may send you in exchange
for the specimens en route. It
would not be so convenient

to me to send funds for them.

In writing of shells the late Dr Carpenter and I bought a little lot of Mr Arthur Adams minute species there was a proposition that they should go together, either that Dr Carpenter or I should have the whole but it was never carried out

If Dr Carpenter has them still and wishes to dispose of them perhaps she would

want a price. There are but
few and would be sent by post

The specimens I judge would
be many of them duplicates &
in small glass tubes & full boxes

I am

My Dear Sir

Yours truly

Robert Damon
