Amer Mus Natl History
New York

Prof J W Dawson LL D

Dear Sir:

Can you furnish
me with a copy of your
address before the Natural
History Society of Montreal in
May 1879 on the Quebec
group. If not can you
tell me where it was
published.

I have been working

this past summer at
Eureka, Nevada where we
have a great thickness of
conformable limestones
and shales of Lower
Silurian and Primordial
rocks with a rich fauna
throughout the series.

Truly yours

Arnold Hague

Hayne
