

2 Mr Stewart
of our party
Oct 14/87

In the scientific papers
of Sir William which they
are now reviewing, you
would allow us to
expend a part of this
in some memorial Col-
lection for Sir William,
& be placed in the
New University Museum.
If you could entertain
this proposal, I know
of several geological
specimens & collectors
of specimens which we
have not otherwise the

means to preserve, and
which could be obtained
and designated as
a gift from Sir William's
heirs, and a memo-
rial of him to
remain in perpetual
possession of the specimens
most imperfectly preserved
by the first.

If you will kindly
thank of this I shall
be much obliged. Mr Grant
seems to be giving great attention
to the business of the article, &
I hope with the removal of Trade
here will be able to show good
results.

Sincerely yours
J. Dawson
