

Penn Law, N.Y. Mch. 26, 1881-

Dr. J. W. Dawson,

Dear Sir: With this Mail
I send two specimens of *P. plummaria*-
and an *Equisetites* about the
origin of which I am uncertain
It was found among a lot of spec-
imens which I collected in Ni-
agara co. last summer - in Niagara and
Clinton groups - but that it belongs there
seems to me, improbable - If of any
value keep it, do not return any
of the specimens -

I should be glad to know whether
the *L. Vanuxemi*, etc. meets the require-
ments; also ~~what~~ your opinion regarding
the "rush"

Very respectfully yours
B. H. Wright
