

New Haven, Conn.

April 5, 1881.

Prof. J. W. Dawson, LL.D.,

Dear Sir:

Although the end of a term is not in all respects the most desirable time to deliver a course of lectures, we are yet so desirous that our students should hear you that we very cheerfully meet your convenience & shall be glad to welcome you as soon after May 2, 1882 as you can come. Our circular is just going to press, but if you will write immediately or (better) telegraph, we shall be able to state the subject of your lectures in your own form, instead of the somewhat general form in which it now stands.

Yours very truly, George E. Day, Secy

Handwritten text, mostly illegible due to fading and bleed-through from the reverse side of the page. The text appears to be a list or a series of notes, possibly related to a project or study. Some words are difficult to discern but seem to include terms like "Project", "List", "Notes", and "References".
