

THE LEISURE HOUR.

56, PATERNOSTER ROW, E. C.

London, April 8 1887

Dear Principal Dawson,

You may have a
visit this summer from
Miss Agnes Crane, a very
learned and scientific
young lady, who (along with
her father also a Fellow
of the Geological Society)
is going to America.
She has letters from
Professor Owen to Harris,
Mant, & Allen; and

asks me to give an
introduction to you, as
she is a fellow contributor
to the Leisure Hour.

She wrote the notice of
your last volume -

The Chain of Life.

She does not agree
with us wholly, it is of
no use arguing with
women in private conference.

She will appreciate

as you tell her

or show here. The books
that prime specimens
are not shown to common
tourists, without scientific
knowledge.

Yours

James Macaulay
